TECHNOLABZ

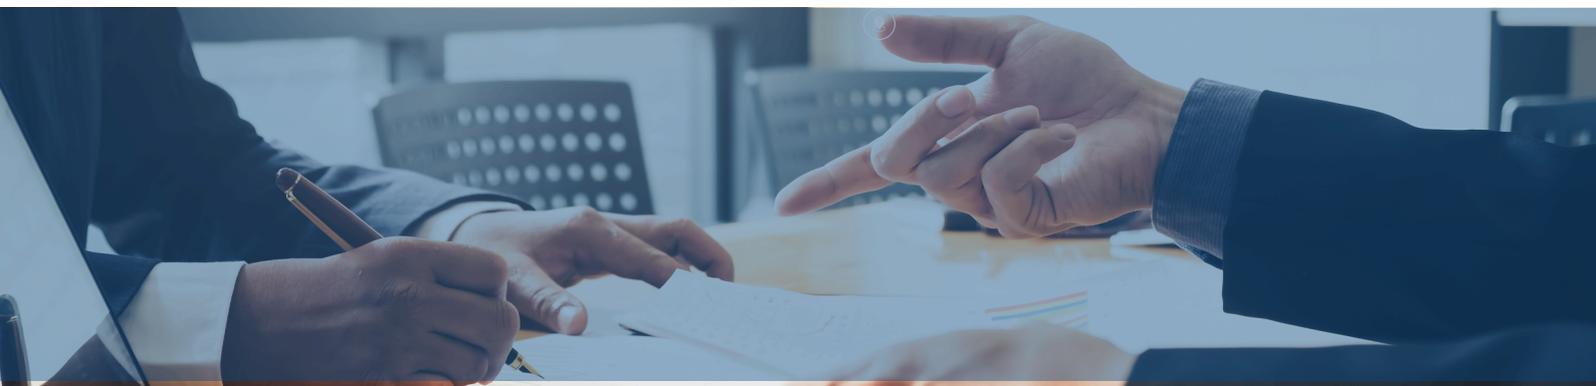

ABOUT CEREBRON

Cerebron Technolabz is one of India's leading embedded software companies, known for exceptional employee satisfaction and world-class customer service.

Headquartered in Panampilly Nagar, Kochi, we are an ISO 9001-certified company founded in 2014. With over 200 successful projects delivered, we specialise in cutting-edge software solutions across diverse domains.

We turn ideas into fully functional systems using advanced technologies and agile methods. Our passionate team of developers and engineers ensures the delivery of highly responsive, reliable, and innovative solutions, always on time and of the highest quality.

OUR SERVICES

1

EMBEDDED & IOT SOFTWARE DEVELOPMENT

Our Embedded Product Engineering (EPE) services encompass the entire product lifecycle — from concept and development through release and end-of-life support. We build innovative, reliable, and scalable embedded and IoT solutions for industries like automotive, industrial automation, multimedia, telecom, storage, and cloud. Our team employs agile methods and utilises advanced technologies to deliver robust, industry-grade solutions that consistently perform in real-world conditions.

2

CUSTOM SOFTWARE DEVELOPMENT

We deliver custom software tailored to your unique business processes. From enterprise applications to SaaS platforms, our solutions are scalable, secure, and built using modern architecture. With strong technical capabilities and a customer-first mindset, we help businesses streamline operations and achieve long-term digital transformation.

3

WEBSITE DESIGN AND DEVELOPMENT

We create stunning, responsive websites designed to engage users and drive conversions. Our websites are optimised for performance, SEO, and mobile responsiveness, ensuring they meet both user expectations and search engine requirements. Whether it's a corporate website or an e-commerce portal, we combine design and function to deliver measurable business value.

OUR SERVICES

4

MOBILE APP DEVELOPMENT

Our team develops user-friendly mobile applications for Android, iOS, and cross-platform environments. We focus on intuitive UI/UX, platform-specific functionality, and performance. Each app is thoroughly planned, tested, and optimised to deliver seamless user experiences and enhance customer satisfaction, enabling brands to maintain credibility in the mobile-first world.

5

SEARCH ENGINE OPTIMISATION (SEO)

Boost your site's visibility and organic traffic with our comprehensive SEO services that combine keyword strategy, on-page optimisation, content enhancements, and technical fixes; we start with rigorous competitor analysis and full-site audits to pinpoint opportunities, strengthen your domain authority through high-quality, relevant link-building campaigns, and provide transparent, data-driven reporting that tracks rankings, traffic, and conversions for sustained, cost-effective growth.

6

SEARCH ENGINE MARKETING (SEM)

Maximise your online visibility with high-impact paid search campaigns across platforms like Google and Bing. SEM allows you to reach users who are actively searching for your products or services, delivering faster results compared to organic methods. We create highly targeted ad strategies based on audience intent, keyword research, and behavioural data. Whether your goal is lead generation, e-commerce sales, or brand awareness, our SEM solutions offer measurable ROI and real-time performance insights.
